Undergraduate Statistics student at Universitas Diponegoro with a technical data science toolkit spanning Python (Pandas, NumPy, scikit-learn, PyTorch), R, and SQL for end-to-end machine learning pipelines and data preprocessing, exploratory data analysis, model development, evaluation, also deployment via Streamlit. Hands-on experience applying supervised and unsupervised learning (Random Forest, SVM, Fuzzy C-Means) and spatial statistics (Moran's I) to real-world classification problems. Seeking a Data Science internship to apply this technical foundation to business-driven data challenges.

EDUCATION

Universitas Diponegoro : Bachelor of Statistics

Aug 2023 – May 2027 (Expected)

GPA: 3.36 / 4.00

Relevant Coursework: Statistical Methods, Financial Mathematics, Data Exploration & Visualization, Databases, Stochastic Processes, Actuarial Mathematics, Econometrics, Time Series Analysis, Forecasting Methods, Business Decision Analysis, Data Mining

EXPERIENCE

Badan Riset dan Inovasi Nasional (BRIN)

Jan 2026 – Feb 2026

Internship at Pusat Riset Iklim dan Atmosfer

- Conducted land use/land cover (LULC) classification research, processing Landsat-5 and Sentinel-2 satellite imagery using Google Earth Engine and QGIS
- Applied Fuzzy C-Means clustering and Random Forest classification to produce a land cover map of Segara Anakan, achieving 79% model accuracy
- Authored kerja praktik report analyzing NDVI and spatial autocorrelation (Moran's I, LISA cluster mapping) for the Segara Anakan mangrove ecosystem in R; built and deployed an interactive Streamlit dashboard to communicate findings

Coding Camp 2026 powered by DBS Foundation x Dicoding Indonesia

Feb 2026 – July 2026

Data Science Cohort CDC-05

- Completed intensive training in end-to-end data pipelines, from data preprocessing and exploratory data analysis to machine learning model development in Python
- Collaborated in an agile team to design and deliver a capstone project, translating a complex dataset into a deployed, user-facing product

PT Telekomunikasi Seluler (Telkomsel) Branch Semarang

Sep 2026 – Present

Mobile Consumer Internship

- Executed targeted digital marketing campaigns via MyAds (WhatsApp and SMS blasts), successfully reaching over 11,000 audiences and driving engagement across 58 partner merchants
- Socialized and promoted the Skul.id platform to students as end-users, boosting digital adoption and platform awareness in educational environments
- Evaluated and reviewed incoming sponsorship proposals submitted to Telkomsel Semarang, assessing partnership alignment and potential business value

PROJECTS

SkinSense : AI-Based Skin Disease Detection Platform

Apr 2026 – Jun 2026

Capstone Project, Coding Camp 2026 (Team CC26-PSU031)

- Performed data analysis and stratified train-test splitting on 48,162 images across 15 skin disease classes for an EfficientNet-based classification model that achieved 86.7% test accuracy
- Built an interactive Streamlit dashboard and conducted A/B testing to evaluate model performance and user experience

Flood Probability Prediction Model

Jun 2026

- Built and compared flood probability prediction models using Random Forest, XGBoost, and LightGBM; LightGBM delivered the strongest performance
- Authored formal methodology documentation covering feature engineering and model evaluation metrics

ORGANIZATIONAL EXPERIENCE

Young On Top Semarang

Jan 2025 – Dec 2025

Staff, Catalyst Division

- Served as Treasurer and Project Officer for two major division projects, including volunteer and community-based initiatives

Pekan Literasi (YOT Semarang x Book Club Semarang)

May 2025 – Jul 2025

Project Officer

- Led a collaborative literacy event with a 9.7k-follower book community; grew attendance 20% through outreach and partnership with two Duta Baca Kota Semarang

SKILLS & CERTIFICATIONS

Programming: Python (Pandas, scikit-learn, PyTorch, Streamlit), R, SQL, MATLAB, HTML/CSS

Data & Statistics Tools: Google Earth Engine, QGIS, IBM SPSS, RStudio, EViews, Minitab, Google Colaboratory

Visualization / BI: Microsoft Power BI, Looker Studio, Streamlit

Other Tools: Microsoft Excel/Word/PowerPoint, XAMPP, Visual Studio Code, Canva

Languages: Bahasa Indonesia (Native), English (Proficient)

Certifications: Belajar Dasar Data Science (Dicoding); Memulai Pemrograman dengan Python (Dicoding); Pengenalan ke Logika Pemrograman (Dicoding); Belajar Dasar Visualisasi Data (Dicoding); Belajar Fundamental Pemrosesan Data (Dicoding); Python for Data Science (MySkill); Corporate Tax (MySkill)
